SUMMARY

Lead Frontend Developer with 15+ years of experience in web application development, frontend engineering, e-commerce, responsive UI development, SaaS applications, website modernization and large-scale platform migration.

Currently working as a Lead Frontend Developer at Enterstellar Softwares Pvt. Ltd., contributing to modern web applications, SaaS products and large-scale e-commerce migration projects using React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Node.js, Prisma and PostgreSQL.

Experienced in transforming business requirements, UI designs and legacy applications into scalable, responsive and maintainable modern web applications. Strong background in frontend architecture, reusable components, e-commerce platforms, application migration, UI/UX implementation, technical analysis, debugging, quality assurance and team coordination.

Alongside frontend engineering, actively developing expertise in Python, Generative AI, RAG, LangChain and AI-powered applications, with a focus on applying AI to practical business and SaaS use cases.

EDUCATION

University of Mumbai

Bachelor of Commerce (B.Com.)

2005

EXPERIENCE

LEAD FRONTEND DEVELOPER

April 2026 – Present

Enterstellar Softwares Pvt. Ltd.

Mumbai, India

- Lead frontend development for modern web applications, SaaS products and business platforms using React.js, Next.js, TypeScript and modern frontend technologies.
- Design and implement scalable, reusable and responsive UI components based on business requirements and product specifications.
- Contribute to frontend architecture, technical decisions, implementation strategies and development standards.
- Work with Next.js, React.js, TypeScript, Tailwind CSS, Node.js, Prisma and PostgreSQL.
- Contribute to large-scale e-commerce migration and application modernization initiatives.
- Analyze existing applications and reference implementations to identify reusable components, business logic and modernization opportunities.
- Work on product, category, content and e-commerce functionality migration and validation.
- Collaborate with developers, business stakeholders and project teams to analyze requirements and deliver features.
- Perform debugging, code reviews, functional validation and quality checks.
- Coordinate technical tasks, dependencies, blockers and delivery activities across the development team.
- Create and maintain technical documentation covering architecture, workflows, migration processes and implementation decisions.
- Contribute to SaaS and AI-enabled product initiatives.
- Explore and implement practical use cases involving Generative AI, RAG and LangChain.
- Work on AI-assisted reporting, automation and intelligent business workflow concepts.
- Evaluate existing codebases to identify opportunities for code reuse, modernization and improved maintainability.
- Key Technologies: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Node.js, Prisma, PostgreSQL, REST APIs, Git, GitHub, Generative AI, RAG, LangChain

LEAD FRONTEND DEVELOPER

August 2013 – March 2026

Rising Northstar Technologies and Solutions Pvt. Ltd.

- Led frontend development for multiple web applications, e-commerce platforms and client-facing business applications.
- Developed responsive and cross-browser compatible applications using HTML5, CSS3, JavaScript, jQuery and Bootstrap.
- Converted UI/UX designs and Adobe Photoshop mockups into responsive, production-ready interfaces.
- Developed frontend interfaces for e-commerce and Java-based web applications.
- Worked with Java, Spring MVC and Hibernate environments while leading frontend implementation.
- Collaborated with Business Analysts, stakeholders and development teams to understand requirements and deliver frontend solutions.
- Created and maintained reusable CSS and JavaScript libraries.
- Converted legacy ASP.NET and PHP-based websites into responsive layouts.
- Worked extensively with WordPress, including theme customization, Elementor Pro and plugins.
- Developed websites and pages according to client requirements and design specifications.
- Performed independent UI quality checks, functional validation and cross-browser testing.
- Coordinated with development and functional teams to ensure smooth project delivery.
- Maintained and enhanced existing websites based on changing business and client requirements.
- Worked on e-commerce applications, website modernization and ongoing enhancement projects.
- Worked with GrapesJS to develop a web-builder solution in a local development environment.
- Participated in requirements analysis, implementation, testing, debugging and production support throughout the software development lifecycle.
- Took ownership of frontend quality, delivery and coordination across assigned projects.
- Key Technologies: HTML5, CSS3, JavaScript, jQuery, Bootstrap, AJAX, XHTML, Java, Spring MVC, Hibernate, PHP, WordPress, Elementor Pro, OpenCart, Adobe Photoshop

HTML / CSS DEVELOPER

August 2011 – July 2013

North Star Technologies

- Developed responsive web pages using HTML5, CSS3, JavaScript and jQuery.
- Converted PSD designs into production-ready web pages using HTML, CSS, JavaScript and PHP.
- Created web and mobile layout mockups using Adobe Photoshop.
- Developed interactive website components and slideshows.
- Resolved browser compatibility and UI issues across major browsers.
- Maintained and enhanced existing websites.
- Implemented website updates based on SEO and business requirements.
- Coordinated with internal teams to ensure smooth project delivery.
- Performed website debugging, UI validation and cross-browser testing.
- Key Technologies: HTML5, CSS3, JavaScript, jQuery, PHP, AJAX, XHTML, Adobe Photoshop

PROJECTS

InternationalDrugMart.com — E-commerce Platform Migration | Role: Lead Frontend Developer | Technology: Next.js, React.js, TypeScript, Tailwind CSS, Node.js, Prisma, PostgreSQL, REST APIs, Git/GitHub

- Contributing to the migration and modernization of InternationalDrugMart.com, a large-scale e-commerce platform.
- Working on the transition from an existing legacy/WordPress-WooCommerce environment toward a modern application architecture.
- Developing the new storefront using Next.js, React.js, TypeScript and Tailwind CSS.
- Analyzing the existing application and reference codebase to identify reusable components, business logic and UI patterns.
- Working on migration of a large product catalog, including products, product categories, manufacturers and blog/content data.
- Implementing responsive product listing, product detail, category and content experiences.
- Developing reusable frontend components to support scalable e-commerce functionality.
- Working on data mapping and validation during migration activities.

- Ensuring migrated content and functionality maintain expected business behavior.
- Performing UI, functional and cross-browser validation throughout the migration.
- Investigating legacy functionality and identifying opportunities for modernization and code reuse.
- Coordinating migration tasks, dependencies, blockers and implementation progress with the development team.
- Maintaining technical documentation for migration architecture, workflows and implementation decisions.
- Supporting integration between frontend, APIs, database and e-commerce business processes.
- Contributing to improvements in maintainability, scalability and overall user experience of the modernized platform.
- Migration Scope: Products; Product Categories; Manufacturers; Blog & Content; E-commerce Functionality; Storefront UI; Data Mapping & Validation; Responsive Design; Legacy Application Modernization

SaaS & Business Application Development

- Contributed to SaaS-oriented business applications involving dashboards, user management, role-based functionality, reporting and business workflows.
- Designed reusable frontend components and responsive interfaces for business applications.
- Participated in feature planning, technical analysis, development and testing.
- Worked on product-focused workflows and reporting functionality.
- Collaborated with cross-functional teams to translate business requirements into technical implementations.

AI-Powered Application Development

- Building practical expertise in Generative AI and AI application development.
- Working with Python, RAG, LangChain and vector database concepts.
- Exploring AI-powered reporting, automation, recommendations and business decision-support workflows.
- Applying AI concepts to SaaS and business application use cases.
- Developing understanding of how AI can be integrated into existing software products and business processes.

TECHNICAL SKILLS

Frontend Architecture & Development

React.js & Next.js

TypeScript & Modern JavaScript

Responsive Web Application Development

SaaS Product Development

E-commerce Development

Enterprise Application Migration

UI/UX Implementation

Reusable Component Development

REST API Integration

Database Integration

Application Modernization

Performance & UI Optimization

Cross-Browser Compatibility

Code Review & Debugging

Technical Documentation

Team Coordination & Technical Leadership

Generative AI Applications

RAG & LangChain

Python

AI-Powered Business Applications
